## E-Chuck

Efficiency through automation with Maprox

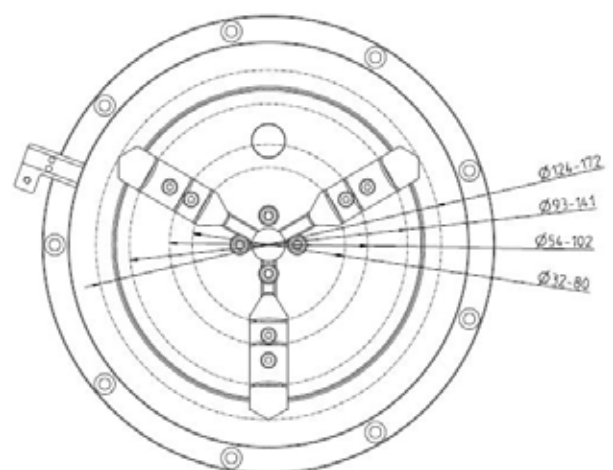

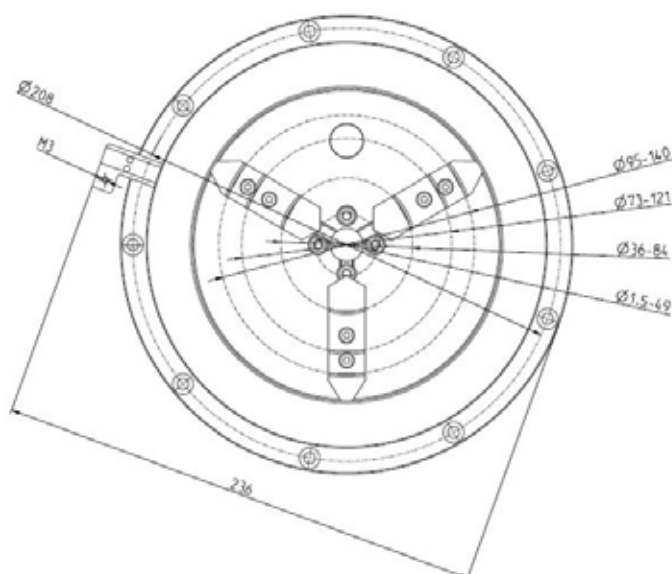

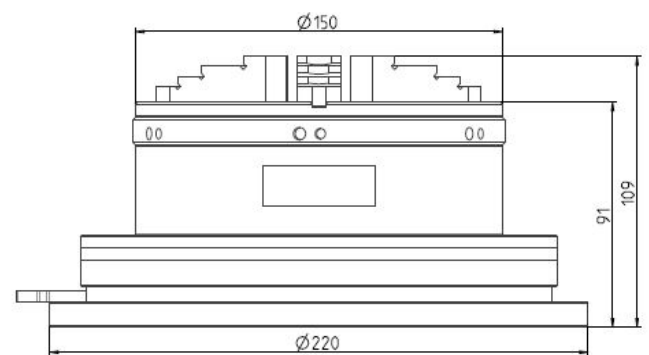

- Fully automatic loading / unloading
- Endless rotation
- Electrical clamping force adjustment / monitoring
- Transmission of commands via IO-Box or CANopen

Type	Item No.	Clamping range [mm]		Weight
		outside	inside	
Maprox E-Chuck	514000.00	1.5-140 mm	- 46-172mm	7.5 kg

### Technical data

- Concentricity: 0.02mm
- Maximum clamping force: 60N
- Maximum part weight: 4 kg
- Weight: 7.5 kg
- Clamping range:  
External clamping: 1.5-140 mm  
Internal clamping: 46-172 mm
- Communication interface: CANopen
- Optional with I/O box
- Voltage: 24 V DC

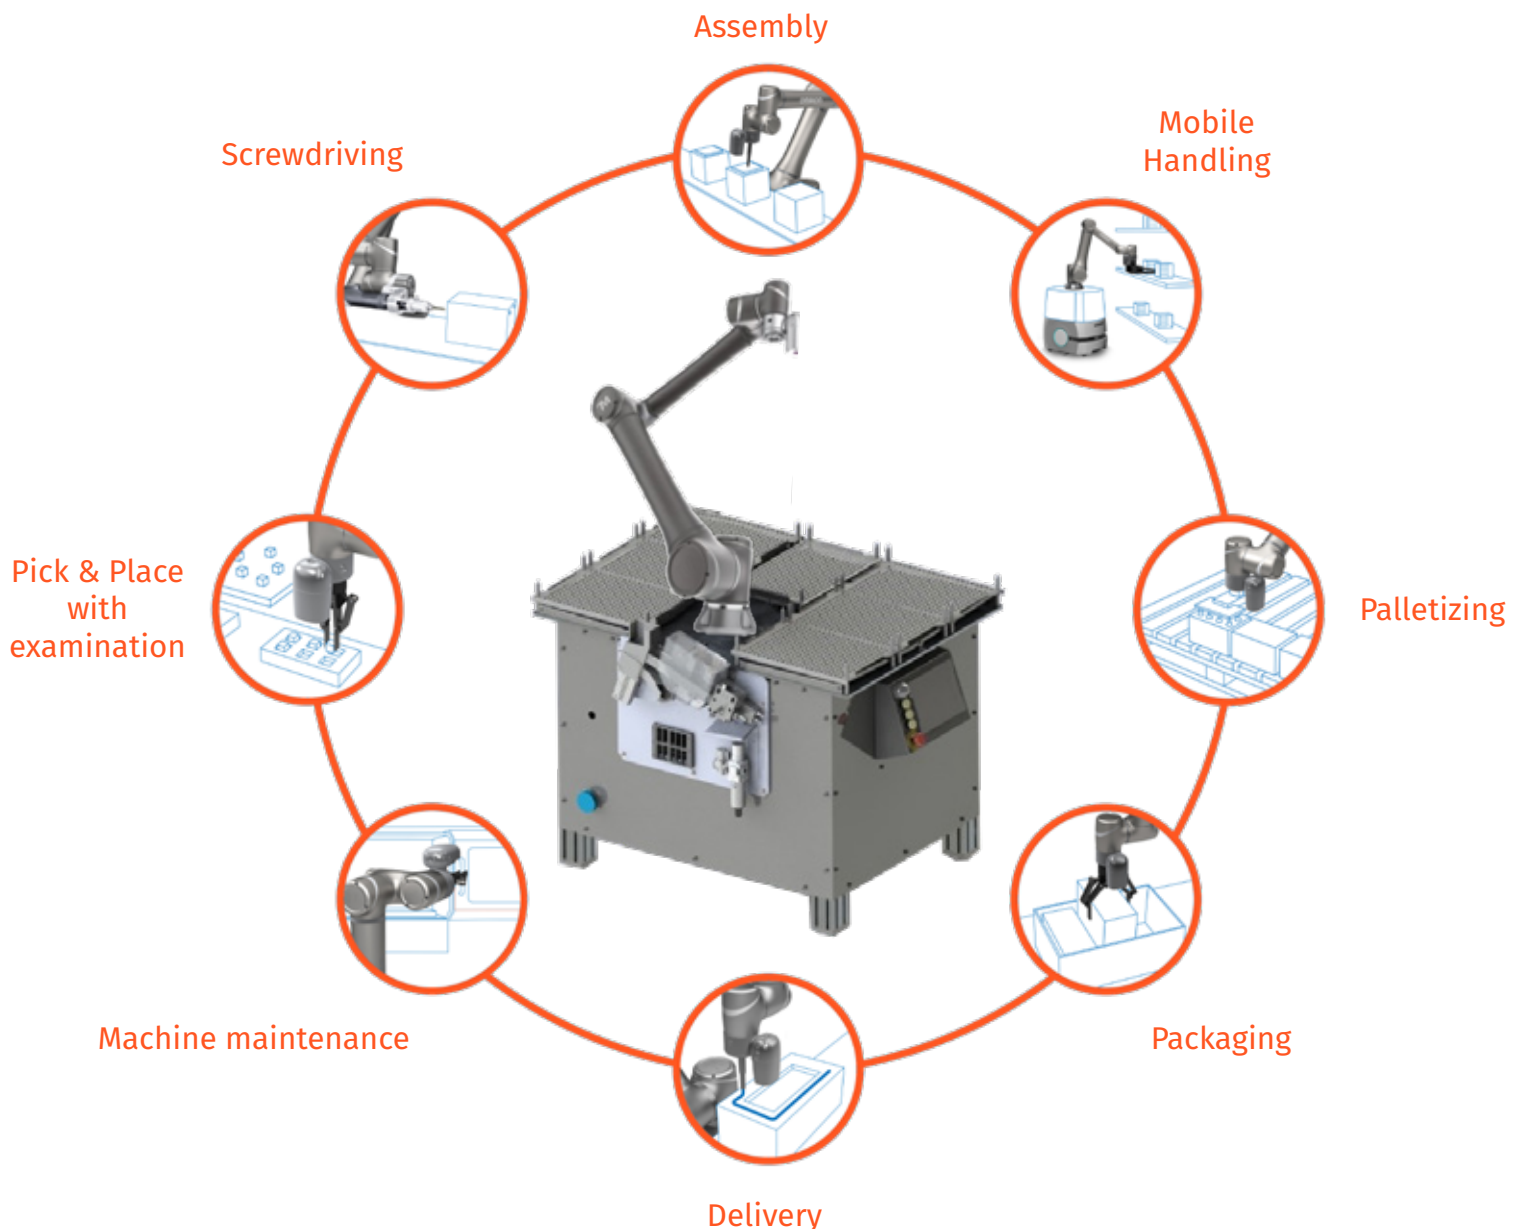

## AUTOMATION

The future of manufacturing is automated - and at Maprox we are leading this revolution. Our products give you the efficiency and productivity you need to take your manufacturing processes to the next level. Discover a world where machines adapt perfectly to your needs and handle complex processes with ease.

If you work in the automotive, aerospace, medical or electronics industries, we have the perfect solution. With our broad product portfolio and years of experience, we offer you customized solutions that are tailored to your specific requirements.

Our slogan „Discover the future of manufacturing - efficiency through automation with Maprox“ is not just a promise, but also our vision. We want to help you take your production to a new level and save time, costs and resources in the process. With Maprox at your side, you have a reliable partner who will help you to make your production more efficient and future-oriented.
